

GUANGZHOU YUBEN HYDRAULIC TECHNOLOGY CO., LTD.

广州誉本液压科技有限公司

A high-tech manufacturing enterprise integrating science,
production and trade.

Main products: Hose Crimping • Hose Cutting • Hose Skiving • Pipe Processing Machines

ABOUT THE COMPANY

2012

Founded

10M RMB

Registered Capital

50+

Machine Models

26+

Patents

60+

Employees

- National High-Tech Enterprise & Technology-Based SME
- Pioneered end-to-end software-controlled production technology in China (since 2020)
- Over 30 CNC machines including Mazak lathes, gantry centers, honing centers
- Hexagon coordinate measuring machines for 100% dimensional inspection
- Raw materials from Siemens, Rexroth, Enerpac and other global leaders
- All products ISO 9001:2015 and CE certified
- Full in-house design & manufacturing of critical components (cylinder heads, blocks, dies)
- Products exported worldwide with strong recognition in Germany and Europe

COMPANY DEVELOPMENT HISTORY

2012

Company Founded

Established in Guangzhou

2016

Trademark

Yuben machine trademark
registered

2020

High-Tech Status

National High-Tech
Enterprise; facility to 3,000 m²

2023

ISO 9001

ISO 9001:2015 Certification
obtained

2024

Innovative SME

Recognized as Innovative
SME

2025

New Plant Start

Construction of 25,000 m²
plant begins

2026

New Plant Launch

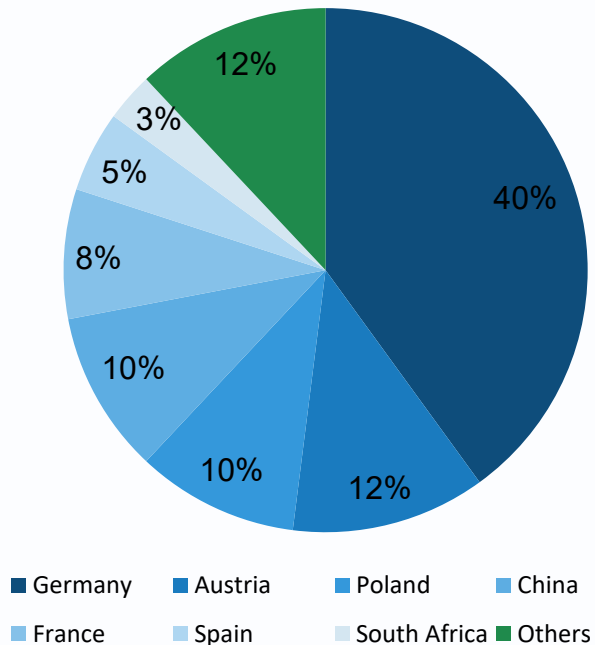

Planned commissioning of
new facility

2027

Expansion

Capacity expansion & new
products (plan)

GLOBAL SALES STRUCTURE

KEY MARKET INSIGHT

Germany — 40%

Yuben products are supplied primarily to Germany — Europe's leading industrial power. The exceptionally high demands of German customers for quality and detail finish serve as compelling proof that our products are highly recognized by clients.

Europe total $\approx$ 70% | Strong presence in Asia, Americas & Africa

PRODUCTION EQUIPMENT & CAPABILITIES

7

Lathes

incl. 4 Mazak

8

**CNC Machining
Centers**

High-precision

4

Grinding Machines

Surface & cylindrical

2

Honing Centers

Precision finishing

1

Drilling & Tapping

Dedicated center

1

Hexagon CMM

+ robotic manipulator

1

Vision Measuring

Projector system

1

Torque Calibration

Tool verification

PRODUCTION ADVANTAGES

100% In-House Critical Parts

Cylinder heads, hydraulic blocks, dies and other key components are fully designed and manufactured at our own factory.

Complete Dimensional Control

100% dimensional inspection of all machined parts using Hexagon CMM ensures consistently high precision.

Proven Assembly Technology

Assembly and testing follow well-designed industrial processes, guaranteeing high quality of the final product.

Optimal Price / Quality Ratio

Enables effective competition with the best international manufacturers while delivering superior value.

STANDARD PRODUCT RANGE

CRIMPING MACHINES

- P-series (P32, P140, P175...)
- Workshop & production models
- Up to 15" capacity
- High force & precision

CUTTING MACHINES

- Hose & pipe cutters
- Clean, accurate cuts
- High productivity
- Safety-focused design

SKIVING MACHINES

- Internal & external skiving
- Precise preparation
- Consistent results
- Easy operation

PIPE PROCESSING & AUXILIARY

- Expanding / tube processing
- Die sets & tooling
- Measuring systems
- Support equipment

CUSTOM SOLUTIONS — END-TO-END PROCESS

01

Requirements & Design

Agreement on configuration.
R&D, design and issue of drawings.

02

Material & Rough Machining

Procurement from top suppliers,
incoming QC, rough then finish
machining on Mazak.

03

Heat Treatment & Finish

Post heat-treatment finish
machining + 100% Hexagon
dimensional inspection.

04

Assembly & Commissioning

Parts move to assembly area for
equipment build and full
commissioning.

05

Die Coating & QC

Zinc-nickel coating with
passivation for dies. Final quality
inspection.

06

Packaging & Shipping

Equipment cleaning, professional
packaging and worldwide
shipping.

WHY PARTNER WITH YUBEN

01

German-Grade Quality

Proven by the most demanding European customers who represent ~70% of our sales.

02

Full Vertical Integration

From simulation & component manufacturing to final assembly — all under one roof with software control.

03

Premium Components

Siemens, Rexroth, Enerpac and other world-class brands ensure reliability and longevity.

04

Growing Capacity

New 25,000 m² plant under construction (commissioning planned 2026) to support global demand.

05

Strong IP Portfolio

26+ patents covering utility models, industrial designs and inventions.

06

Competitive Value

Excellent price-to-quality ratio that delivers European performance at optimized cost.

THANK YOU

We look forward to working with you!
